

Environmental Protection Policy

Environmental protection is one of the principal priorities of Gas Storage CZ, a. s. Complying with all legislative and other requirements is an integral part of our business. In the framework of natural gas storage operations, we consider environmental protection part of our corporate social responsibility and respect for employees and the localities where we operate.

Environmental protection is incorporated in all of our work and decision-making processes. We are dedicated to minimizing the adverse environmental impact of our operations, to prevent emergencies, and to improve the company's ecological profile in an ongoing manner.

We continually assess and improve the company's environmental performance. Environmental criteria are taken into account throughout the lifecycle of our services, in all of our main processes, their inputs and outputs, including processes involving customers.

We promote the exchange of information and an open dialogue with all stakeholders in the area of environmental protection.

We are dedicated to the ongoing improvement of our staff's awareness of laws and new trends in environmental protection. We train and educate employees to ensure that all of their work tasks are compliant with the law and conforming to gas Storage CZ, a. s. social responsibility and environmental protection targets.

The company's management is committed to ongoing improvement through environmental programs mainly aimed at reducing waste and emissions from the air pollution sources we operate. Likewise, we lay emphasis on preventing large-scale accidents, where the objective is to improve the safety of operations and to prevent situations endangering property, the environment, and the lives and health of employees. These targets are set in consideration of key environmental aspects.

Our commitment to environmental protection includes maintaining and promoting biodiversity at our selected complexes.

All employees of Gas Storage CZ, a. s. are required to observe and fully adhere to the Environmental Protection Policy.
